USE ENERGY WISELY

Learn more about our role
in the **CHARGE EV** network
and how we incorporate
green energy into the mix

Evergreen[™]
Everywhere

www.charge.coop

As part of CHARGE EV, we are among 31 electric cooperatives partnering with ZEF Energy to install public charging stations in cooperative service territories.

Additionally, smart chargers will be available soon for members to install at home for their personal electric vehicle charging needs. These units will charge your vehicle during times when electricity is less expensive, which helps keep our electricity rates stable.

Electric vehicles utilizing these smart chargers are also enrolled in *Evergreen Everywhere*. This is a green energy program that assures 400 kilowatt-hours (kWh) of monthly smart charger energy consumption will be from renewable energy sources so a member can hit the road for an emissions-free road trip.
